9. The preceding are our best estimates of the areas in Venezuela most likely to contain guerrilla encampments and related activities. The areas between the delineated zones in western Venezuela cannot be ruled out, however, since the reporting has been fragmentary, and available maps and aerial photographs are inadequate in terms of both coverage and scale. For this reason, it is recommended that first priority should be given to the entire area bounded by geographic coordinates $12^{\circ}20'N-70^{\circ}00'W$, $10^{\circ}45'N-67^{\circ}40'W$, $07^{\circ}40'N-71^{\circ}20'W$, and $11^{\circ}00'N-72^{\circ}00'W$, which includes target areas 1 through 7. Second priority should be given to target area 8, bounded by geographic coordinates $10^{\circ}45'N-63^{\circ}00'W$, $10^{\circ}00'N-63^{\circ}00'W$, $10^{\circ}00'N-64^{\circ}45'W$, and $10^{\circ}45'N-64^{\circ}45'W$. The remainder of the country should then be given consideration.
